Standards and Interpretations issued but not yet effective

AASB 1060 General Purpose Financial Statements - Simplified Disclosures for For-Profit and Not-for-Profit Tier 2 Entities

This standard is applicable to annual reporting periods beginning on or after 1 November 2021. AASB 1060 provides a new Tier 2 reporting framework with simplified disclosures that are based on the requirements of Australian Accounting Standards for SMEs. Given that the company already prepares financial statements under the reduced disclosure requirements there is not likely to be an impact on the company's financial statements on adoption of this standard.

Critical Accounting Judgments, Estimates and Assumptions

In the process of applying the company's accounting policies, management has made a number of judgments and applied estimates of future events. Judgments and estimates that are material to the financial statements include:

Recognition and Measurement

Revenues are recognised at fair value of the consideration received or receivable net of the amount of goods and services tax (GST) payable to the taxation authority. Transfer of goods or services of the same nature and value without any cash consideration are not recognised as revenues.

Dividend income is recognised at a point in time when the right to receive payment is established.

Interest revenue is recognised using the effective interest rate method, which, for floating rate financial assets is the rate inherent in the instrument.

The gain or loss on disposal of property, plant and equipment is calculated as the difference between the carrying amount of the asset at the time of disposal and the net proceeds on disposal (including incidental costs) and is recognised as other income at the date control of the asset passes to the buyer.

3 Income Tax

Income Tax Expense

The Income Tax Assessment Act, 1997 (amended) provides that under the concept of mutuality clubs are only liable for income tax on income derived from non-members and from outside entities.

Deferred Tax Asset Not Taken to Account

Deferred tax asset attributable to tax losses carried forward and timing differences has not been recognised as an asset because recovery is not probable.

Capital losses carried forward	45,009	213,118

- i) The company derives future assessable income of a nature and of an amount sufficient to enable the benefit to be realised.
- ii) The company continues to comply with the conditions for deductibility imposed by law, and
- iii) No changes in tax legislation adversely affect the company in realising the benefit.

3 Income Tax (Cont.)

Recognition and Measurement

The income tax expense or benefit for the period is the tax payable on that period's taxable income based on the applicable income tax rate, adjusted by changes in deferred tax assets and liabilities attributable to temporary differences, unused tax losses and the adjustment recognised for prior periods, where applicable.

Deferred tax assets and liabilities are recognised for temporary differences at the tax rates expected to apply when the assets are recovered or liabilities settled, based on those tax rates that are enacted or substantively enacted.

Deferred tax assets are recognised for deductible temporary differences and unused tax losses only if it is probable that future taxable amounts will be available to utilise those temporary differences and losses.

The carrying amount of recognised and unrecognised deferred tax assets are reviewed each reporting date. Deferred tax assets recognised are reduced to the extent that it is no longer probable that future taxable profits will be available for the carrying amount to be recovered. Previously unrecognised deferred tax assets are recognised to the extent that it is probable that there are future taxable profits available to recover the asset.

Deferred tax assets and liabilities are offset only where there is a legally enforceable right to offset current tax assets against current tax liabilities and deferred tax assets against deferred tax liabilities; and they relate to the same taxable authority on either the same taxable entity or different taxable entity's which intend to settle the claim simultaneously.

Recognition and Measurement

Financial assets are recognised at fair value through other comprehensive income, which includes equity investments which the entity intends to hold for the foreseeable future and has irrevocably elected to classify them as such upon initial recognition.

Financial assets are initially recognised at cost. These assets are subsequently measured at fair value with any incremental gains or losses being recognised through other comprehensive income. This classification is determined based on the business model within which such assets are held.

Key Estimate and Judgement: Fair value measurement

The company is required to classify all assets and liabilities, measured at fair value, using a three level hierarchy, based on the lowest level of input that is significant to the entire fair value measurement, being:

- Level 1: Quoted prices (unadjusted) in active markets for identical assets that the company can access at the measurement date;
- Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly; and
- Level 3: Unobservable inputs for the asset or liability. Considerable judgement is required to determine what is significant to fair value and therefore which category the asset or liability is placed in can be subjective.

The fair value of the financial assets disclosed above use a level 1 fair value measurement as the assets are quoted priced prices in an active market that the company can access at its financial year end date.

12 Summary of Other Significant Accounting Policies

(a) Impairment of Assets

Non-financial assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount.

Recoverable amount is the higher of an asset's fair value less costs to sell and value-in-use. The value-in-use is the present value of the estimated future cash flows relating to the asset using a pre-tax discount rate specific to the asset or cash-generating unit to which the asset belongs. Assets that do not have independent cash flows are grouped together to form a cash-generating unit.

(b) Fair Value Estimation

The fair value of financial assets and financial liabilities must be estimated for recognition and measurement or for disclosure purposes.

The carrying value of trade receivables and payables are assumed to approximate their fair value due to their short term nature.

The fair value of financial liabilities for disclosure purposes is estimated by discounting the future contractual cash flows at the current market interest rate that is available to the company for similar liabilities.

(c) Cash and Cash Equivalents

Cash and cash equivalents includes cash on hand, deposits held at call with financial institutions, other short-term, highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

(d) Amalgamation

During the year the Company entered into an Amalgamation agreement with Dooleys Lidcombe Catholic Club Ltd. The Amalgamation was approved by the Company's members on 2 July 2021 however is still ongoing as it is subject to final approval by the Independent Liquor and Gaming Authority. This is expected to be finalised by no later than November 2027.
